Contract

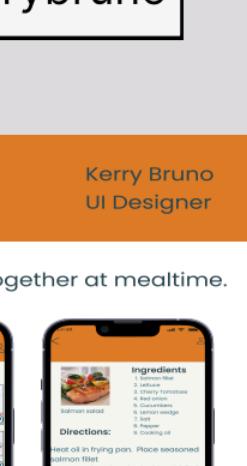

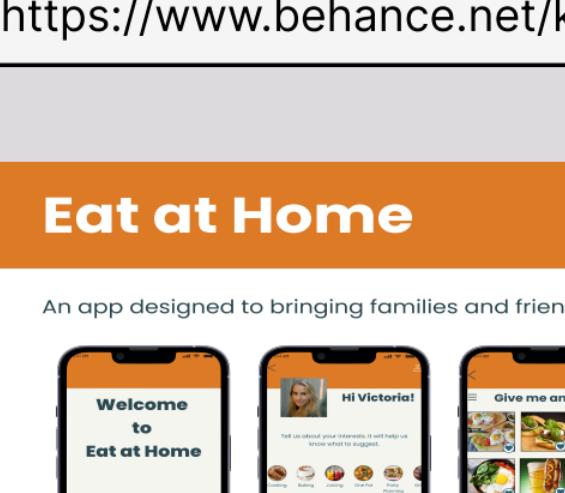

# Hi, my name is Kerry Bruno.

I'm a UI designer from Atlanta, GA.

I come from a printing background and I enjoy the creative process of making something from nothing.

## My work

### Case Study

## Wine Time

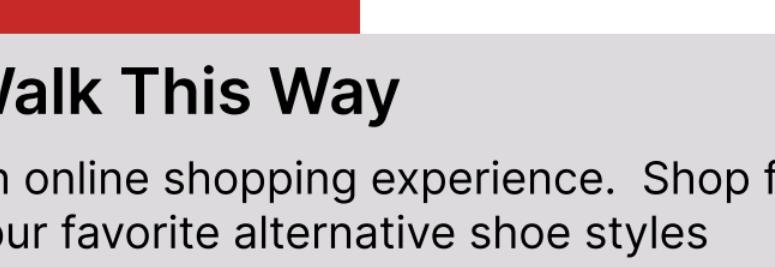

Wine Time is a diary style app designed to have one place to save your favorite wines.

## Eat at Home

Kerry Bruno  
UI Designer

An app designed to bring families and friends together at mealtime.

## Eat At Home

Eat At Home was made for families to learn to cook and eat together. Making quality time with loved ones a priority.

About

Contract

## Wine Time

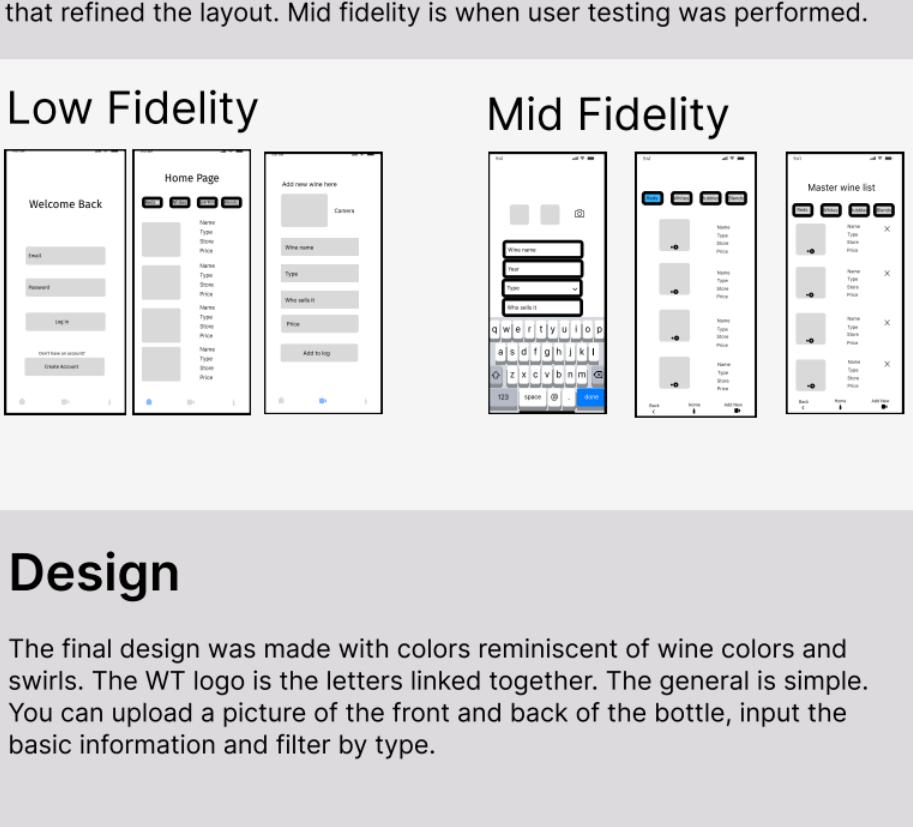

### Case Study

Kerry Bruno  
UI Designer

Wine Time is a diary style app designed to have one place to save your favorite wines.

## My Process

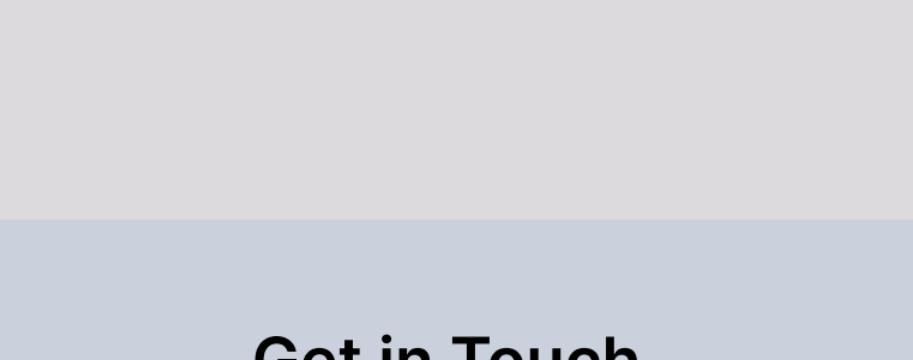

## Research

I searched the app store to find out what was already available. Other wine apps are about finding a great wine, tasting notes or pairings. Ex: Wine Study and Vivino.

## Wireframe

Wireframe process went from low fidelity figuring layout to mid fidelity that refined the layout. Mid fidelity is when user testing was performed.

## Design

The final design was made with colors reminiscent of wine colors and swirls. The WT logo is the letters linked together. The general is simple. You can upload a picture of the front and back of the bottle, input the basic information and filter by type.

## Prototype

<https://www.figma.com/file/3TbLWiB0d8frazWTdgnm4w/4.9-iOS-prototyping?t=i8pk1cUCZjErEvB-Y>

## Conclusion

This app was fun and fulfilling to make. I have personally wanted an app just like this for years. This app has been designed for both Android and iOS platforms.

Future iterations could include adding an other filter for beer or alcohol, notes section and share features.
